

JaguarSoft

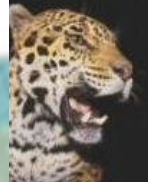

JaguarDeviceLock I/O Control

JaguarDeviceLock Service

JaguarDeviceLock is a very useful tool for IT management/Security Departments to control the usage of PC I/O 's. It prevents data leaks and unauthorized Network access by setting user-by-user (or group) I/O access rights on Local Computer or Domain accounts.

JaguarDeviceLock gives network administrators control over which users can access what devices (floppies, serial and parallel ports, DVD-ROMs, CD-ROMs, ZIPs, USB, FireWire, Infrared, WiFi, Bluetooth, etc.) on a local computer. Once JaguarDeviceLock is installed, administrators can control access to floppies, CD-ROMs or any other device, depending on the time of day and day of the week. JaguarDeviceLock enhances access control for Windows System Administrators and helps control removable disk usage. It can protect network and local computers against viruses, trojans and other malicious programs often injected from removable disks.

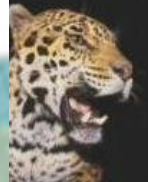

JaguarSoft

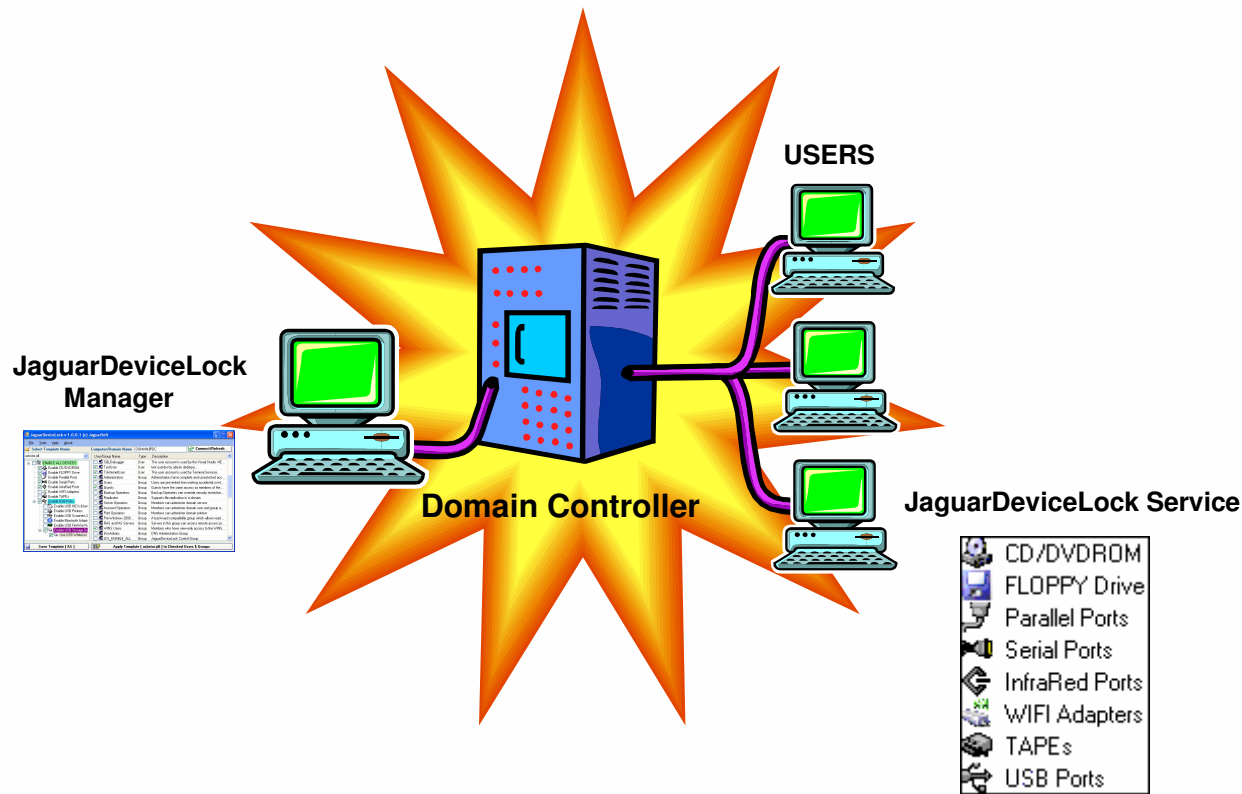

JaguarDeviceLock Service

- **Single Windows Service Application (NTService)**
- **Easy configuration**
- **Local/Domain Users & Groups mechanism**
- **Open Interface**
- **Runs on NT/2000/XP/2003**
- **No Database required**
- **Simple easy-to-use Management**
- **Easy Templates**
- **Event viewer support**
- **Easy Install to Remote Computers**
